**TETERBORO** — The Aviation Hall of Fame & Museum of New Jersey opened its cockpit doors on Saturday to give visitors a view from behind the controls of historic aircraft.

As modern planes from Teterboro Airport flew overhead, children from around New Jersey — most of them members of local Boy and Girl Scout troops — crawled inside a military attack helicopter, airport fire truck and a commercial airliner.

In addition to the cramped cockpits of one- and two-person planes, visitors streamed in and out of a massive Martin 202A twin engine airliner, a commercial passenger plane from the 1950s.

The museum holds is open year-round, but only opens the cockpit doors five weekends a year. Take a step inside the aircraft yourself with our photo gallery from the event. **Take the tour »**
